Education

- September 2021 to Present **Ph.D. in Biostatistics**, *University of Michigan*, Ann Arbor, MI, USA.
- GPA: N/A
- September 2019 to December 2020 **M.A. in Statistics**, *Columbia University*, New York, NY, USA.
- GPA: 3.90
 - Awards and Honors:
 - Chair's List of Academic Achievement: Spring 2020
 - First Place: DataFest Fall 2019
- September 2014 to April 2018 **B.S.E. in Data Science**, *University of Michigan*, Ann Arbor, MI, USA.
- GPA: 3.31 *Cum Laude*
 - Minor in Mathematics
 - Awards and Honors:
 - Dean's Honor List: Fall 2017, Winter 2018
 - University Honors: Fall 2017, Winter 2018
 - Best Software Award: iGEM Competition 2016
 - Gold Medalist: iGEM Competition 2016, 2017

Core Competencies

- **Programming Languages:** Python, R, SQL, Javascript
- **Skillsets:** Data Mining, Machine Learning, API Development, Project Management
- **Technologies:** Numpy, Tensorflow, BUGS/JAGS, Chart.js, Microsoft Access

Experience

- July 2021 to Present **Research Assistant**, *University of Michigan Department of Biostatistics*, Ann Arbor, MI, USA.
- Developed hierarchical Bayesian model to study the difference in the prevalence of adverse events between the COVID-19 vaccine and other vaccines, as well as compare these differences between the various COVID vaccines
 - Expanded model to group the effects based on a Dirichlet clustering approach to address convergence issues, as well as incorporated negative controls to reduce bias
- April 2020 to July 2021 **Research Assistant**, *Columbia University Department of Biomedical Informatics*, New York, NY, USA.
- Developed novel attention mechanism that is interpretable and incorporates evidence from medical literature, improving performance over standard attention in BioBERT by up to +0.3 F1 on medical QA datasets
 - Designed and implemented framework for the normalization of PICO Observation elements for the extraction and representation of medical evidence from medical literature
 - Built preliminary system to detect contradictions in the findings of medical literature, scaling process to be applied to 100,000 abstracts published on PubMed from 2015-2020
- February 2020 to August 2020 **Data Analyst Intern**, *Icahn School of Medicine at Mount Sinai*, New York, NY, USA.
- Student position in Dr. Roxana Mehran's Interventional Cardiology group reporting to Dr. Samantha Sartori.
- Generated analysis and visualizations for cardiovascular outcomes studies
 - Set up the automated generation of reports for large-scale studies for presentation to sponsors and review boards
- June 2018 to July 2019 **Data Scientist**, *Algo*, Troy, MI, USA.
- Lead design and implementation of new forecasting modules, improving accuracy by 12% over original forecaster
 - Appointed customer-facing technical lead of behind-schedule demand planning project, successfully completing the project on time by incorporating new development and requirements-gathering practices
 - Optimized and corrected SQL in daily ETL processes, lessening system strain and reducing processing errors
 - Mentored new employees through on-boarding process with pair programming exercises, overviews of relevant statistical concepts, and one-on-one meetings to discuss progress
- May 2018 to January 2019 **Student Researcher**, *University of Michigan*, Ann Arbor, MI.
- Independent research under Dr. Yves Atchade to develop multinomial bayesian models for cancer-type classification.
- Derived and implemented preliminary classification model, including optimizations for computational efficiency
 - Enhanced original model using spike-slab priors to account for sparsity, in addition to Polya-Gamma augmentation to yield a closed form posterior for binary case

- September 2017 to April 2018 **Research Assistant**, *Center for Molecular Imaging*, Ann Arbor, MI, USA.
 Student position to support Dr. Craig Galban and his team in medical imaging data analysis.
 ◦ Designed and implemented application to automate processing of new data sets, saving time and reducing errors
 ◦ Built tool consolidating all image analysis scripts into single interface, streamlining process flow
 ◦ Assisted in the preparation of incoming datasets, including orienting, rotating, and cropping of images
- May 2017 to August 2017 **Machine Learning Engineering Intern**, *Algo*, Troy, MI, USA.
 ◦ Integrated statistical clustering methods into API, enabling on-demand analysis of store performance data
 ◦ Developed proof-of-concept system to automate unit testing, simplifying deployment and reducing bug reports
 ◦ Wrote web scraper to augment available customer data using information from Rotten Tomatoes and IMDB, retrieving movie meta data information including genre, ESRB rating, box office, director, and audience response
 ◦ Built process to export customer data in email and powerpoint formats, allowing results to be readily shared
- January 2017 to December 2017 **Student Researcher**, *ProQuest*, Ann Arbor, MI, USA.
 Student-run pilot research project to improve the pharmaceutical literature review process using machine learning.
 ◦ Researched natural language processing literature to determine appropriate algorithms; final model used GloVe embedding with an LSTM architecture to determine if an article's findings should be reported to the FDA
 ◦ Designed data normalization process to simplify training and streamline implementation of production system
 ◦ Implemented final algorithm to perform document classification, achieving 80% precision and 96% recall
 ◦ Organized meetings with team members, company sponsors, and faculty advisers to report and present progress

Kini, S. K. Sharma, G. D. Dangas, and R. Mehran. Sex Disparities Among Patients Undergoing Complex Percutaneous Coronary Intervention (PCI): Insights From a Single-Center Large-Volume PCI Registry. *Journal of the American College of Cardiology*, 76(17 Supplement S):B162–B163, 2020. (Accepted as abstract).

Extra-Curricular Activities

- November 2020 to March 2021 **Graduate Student Mentor**, *Ardsey High School*, New York, NY, USA.
 ◦ Assist students with statistical analysis components of Westchester Science and Engineering Fair projects
- October 2019 to March 2020 **Website Developer**, *Columbia Department of Statistics*, New York, NY, USA.
 ◦ Developed ASA Statistical Learning/Data Science section's 2020 conference website
- October 2015 to April 2018 **President**, *Michigan Biological Software Team*, Ann Arbor, MI, USA.
 ◦ Gold Medalist at International Genetically Engineered Machine (iGEM) Competition 2016, 2017
 ◦ Best Software Award at iGEM Competition 2016

- January 2016 to March 2016 **Workshop Leader**, *Canton Public Library*, Canton, MI, USA.
o Organized and delivered superhero themed chemistry workshop to elementary school library patrons
- January 2015 to August 2015 **Webmaster**, *Michigan Biological Software Team*, Ann Arbor, MI, USA.
o Bronze Medalist at iGEM Competition 2015

Community Service

- 2006 to 2019 **Volunteer**, *Zaman International*, Dearborn, MI, USA.
o Packaged and delivered food to clients
o Organized fund raising efforts with local supermarkets
- 2012 to 2019 **Mathematics Tutor**, Dearborn, MI, USA.
o Tutoring for college-level math courses and math sections of GRE and PCAT exams
- June 2013 **Volunteer**, *Beaumont (Previously Oakwood Hospital)*, Dearborn, MI, USA.
o Clerical work and support in pathology department
- September 2011 to May 2013 **Tutor**, *WISE Academy*, Dearborn, MI, USA.
o After-school volunteer tutor for students K–12th grade

Languages

- **English**: Native Language
- **Arabic**: Fluent
- **French**: Full working proficiency
